

**Full name of patient:** Mrs Salma Al Nuaimi

**Patient ID:** 248312097

**Age of patient:** 69 years old

**Gender:** Female

**Address:** Umm Al Quwain, UAE

**Patient's clinical history:**

Mrs Salma Al Nuaimi was accompanied by her niece for today's visit. She is a 69-year-old widow and retired cook. She reported gradual memory loss, difficulty recalling recent events, and occasional disorientation.

Mrs Salma was initially assessed at Royal Health Clinic in Umm Al Quwain in early 2023. Cognitive tests and brain imaging indicated early-stage Dementia. No signs of stroke or other neurological complications were found at that time.

**Diagnosis / Medical condition:**

1. Dementia

**Treatment result:**

She is currently on a memory-enhancing medication regimen and enrolled in cognitive therapy. She was polite and cooperative during the assessment, but had trouble recalling the day and her location. Her long-term memory remained mostly intact.
