

**Full name of patient:** Ms Mariam Al Hammadi

**Patient ID:** 237908541

**Age of patient:** 66 years old

**Gender:** Female

**Address:** Ajman, UAE

**Patient's clinical history:**

Ms Mariam Al Hammadi was brought in by her daughter. She is a 66-year-old retired librarian. She complained of joint stiffness, pain in the knees, and limited mobility especially in the morning.

She has had Rheumatoid Arthritis for over a decade. Recently, she was also diagnosed with Chronic Kidney Disease due to prolonged use of NSAIDs. She was admitted to Ajman General Hospital in February 2024 for further nephrology evaluation.

**Diagnosis / Medical condition:**

1. Rheumatoid Arthritis
2. Chronic Kidney Disease

**Treatment result:**

Ms Mariam is undergoing physical therapy and has been shifted to kidney-safe medications for pain management. She understands her condition and was able to recall details of her treatment accurately. Her cognitive functions are stable.
